HEAVY STAND OF WHEAT INDICATES PROMISE OF ANOTHER BUMPER CROP

Wheat Well Headed Out and Standing Thickly in the Fields—Grain Shows Rapid Growth Between

The condition of the wheat crop in the Basano district is almost perfect. The grain stands from three to four feet high, it is well headed out, the stand is thick, and there is a good supply of moisture in the soil.

This briefly summarizes the condition of the wheat seen in the fields of farms in the Basano and neighboring districts.

The dark green fields of wheat are a beautiful sight to see as they sway and ripple in the breeze. The grain is growing rapidly—shoots up inches in a few days' time. The best crops were headed out many days ago, and the grain is now in the hands of the farmer.

From the appearance of the grain many fields should yield heavily under continued favorable conditions and should equal the heavy yields of last year when 40 and more bushels to the acre were threshed.

Heavy showers falling every few days during the past two weeks have kept the ground saturated with moisture. Farmers now want dry weather and warm sun.

Farmers have been having much difficulty in making hay on account of the frequent rains. For the past couple of weeks there has been so much rain that hay making is impossible. Hay that is cut is no longer dried up after one rain but it is again soaked with another. The weather now, however, appears to be settled, and farmers hope to finish their haying operations without further interruption.

The work of summer fallowing has been greatly retarded because of the muddy ground following the many rains. The work on summer fallow has almost covered the ground in some fields, but it is impossible to get it done in others.

Conditions for breaking have been good since early in June, and much new sod has been turned under.

POLICE COURT

A number of cases came up for hearing before Magistrate A. O. Bond in the Basano police court last week.

Poor falling to have two license plates attached to his car, Cornelius Klassen, of Crowfoot, was fined \$1 and costs.

For operating a motor vehicle with no lights at a time more than one hour after sunset, Rene LeBlanc, of Rosemary, was fined \$10 and costs.

Three men were fined \$20 and costs for being in an intoxicated condition in a public place. Two of them took the alternative, which was one month in Leithbridge jail with hard labor.

Another charge was that of common assault, and a sentence of one month in Leithbridge jail with hard labor was passed. The accused was also fined \$20 and costs for being intoxicated in a public place, and an order of interdiction was issued.

Referee Gives Fight To Rogers

Butterworth Has Best of the Fight But Loss to Miss Claimed To Be Paid

R. M. Butterworth, of Basano, fought Tommy Rogers, of Calgary, eight rounds of a scheduled ten round bout in the Gem stadium last night. Rogers was the victor in the fight, but the referee had been struck on the kidney. After some argument the referee called it a foul and gave the fight to Rogers. Rogers was the victor in the fight, but the referee had been struck on the kidney. After some argument the referee called it a foul and gave the fight to Rogers.

Rogers went down twice for the count of nine in the seventh round. Butterworth landed a blow under the heart that sent Rogers to the canvas for the count of nine. He was just able to stagger to his feet and fell into a clinch at once. A few seconds later Butterworth again felled Rogers who was only saved from a knockout when the gong sounded for time.

Rogers' boxing skill and ring experience sent him from more punishment in the eighth round, and aggressive opponent.

The main bout was to have been between Butterworth and Nelson Persson, of Calgary, but Persson could not make arrangements for the fight, so Rogers substituted.

Two other bouts on the boxing card in the Dominion, aged 17 and 18, were also fought.

MANY TOURISTS

A heavy stream of tourist traffic passes through Basano these days, travelling both east and west. Cars are seen from practically every province in the Dominion, and from many states across the border.

PAKES OWN LIFE SHOTGUN

W. C. Armstrong, employed on the farm of Dr. W. G. Anderson, shot 10 miles east of Stettville, committed suicide last Tuesday morning, July 17th.

Armstrong had been acting queer the day before. He was missed at breakfast time on Tuesday morning and a search was made for him. The body was found in the implement shed with a shotgun beside it which he had used to shoot himself in the head.

Armstrong was about 40 years of age. He had worked on the farm of Dr. Anderson for 4 or 5 years.

Two Days Chautauqua Coming To Basano

A 2 day Chautauqua program will be shown in Basano on Monday and Tuesday, August 13th and 14th. The programs will be given in the Masonic Community Hall.

The well known McDonald Kiddie will entertain on the program one night, and on the other the Toriano Schubert Quartette will present a musical program.

Gem News

GEN. JULY 18—Miss Howard, of High River, is spending a few days holidays with her old classmate, Charlie Douglas, son of D. Douglas. Miss Howard returned home last Sunday morning after three weeks' holidays and business trip to the States. Gem still looks good to her, she says.

The Pollock brothers journeyed to Hesper last Sunday to play baseball with the Basano team against Hesper. They also went with the Basano team on Thursday this week to Chancellors.

Miss Ethel Dodd has accepted a position with the Books branch of the Royal Bank of Canada.

Mrs. Pollock and daughters spent Sunday with Mr. and Mrs. Harry Jones, of Basano.

Mr. and Mrs. C. Jones, of Winterwood Hills, with a few friends, were weekend guests of Mr. and Mrs. Ralph Brown.

Mrs. Hughes, of Hinton, is enjoying a holiday with the Keatings.

M. Atkins visited the Calgary branch of the Gem on Sunday.

Dr. Barlow, veterinary surgeon, was called to the Scherfman farm on Friday last when a number of cows were ill.

Horse buyers for the Russian government are at the Hall Way House this week.

Mrs. McElroy, of Hinton, formerly of Gem, is spending a few days in the Colony visiting friends.

Mr. and Mrs. Roy Robinson, of Hinton, are visiting in the Colony.

Mr. and Mrs. C. Jones, of Winterwood Hills, were among those who attended the Gem stampede on Wednesday.

Mrs. and Mrs. C. Jones, of Winterwood Hills, spent Wednesday evening with Mr. Miller, our local telephone operator.

The stampede on Wednesday was well attended, and a great success.

All enjoyed the excellent music played by the Basano orchestra at the dance Wednesday evening.

Mrs. Groves was a welcome party at the Magnolia home Wednesday afternoon.

Several of the married ladies of the Colony are joining the younger set, and planning to shower Mrs. G. Keating before her departure from the Colony for Crofton, England, where her marriage to Mr. A. Cutting, who is an official in the Crofton post office, will take place during September.

Miss Keating plans to leave about the second week in August for Indiana, where she will visit her brother Ted, and other friends.

Mr. and Mrs. H. Maguire, who have been on a two day holiday, came home Wednesday evening.

Several people from Brooks and Basano attended the show and dance given Monday night in the U. F. A. Hall.

Miss Christina Dunsmore went to Brooks to spend the week visiting her brother Bob, and friends.

Miss Margaret Woodward was back to Basano to visit and take in the Gem stampede.

Mrs. Barrett returned to her home in Medicine Hat after spending a few days with relatives.

Mr. and Mrs. E. B. Brown and family motored to Stettville Sunday to visit Mr. Jewell and family.

Mr. and Mrs. E. McDonald and Mr. and Mrs. Ross McDonald and daughter Jean and Ade returned last night from a motor trip to Calgary, Banff, and Golden, B. C.

Mrs. Wenger and family and Miss Anderson returned Monday night from Banff and Calgary where they spent a week's holiday.

Mrs. P. Anderson and Heier and Jackie have gone to Calgary to spend a week.

THE ROADS

The roads are not good. Here and there the motorist will find a smooth stretch, but for the most part they are rough, rutted, and bumpy.

Four Teams Will Play Ball Here Next Wednesday

Four Team Baseball Tournament Will Be Staged in Basano on Wednesday, July 25th

The baseball teams of Arrowwood, Hesper, Glenora, and Basano will battle on the Basano diamond in a baseball tournament to be held here next Wednesday, July 25th. This will be a day of a regular half holiday.

Prize money amounting to \$145 will be distributed among the teams, \$75 going to the winner of the tournament, \$50 second money, and \$20 to each of the other teams.

All the teams will field a strong lineup, and it is believed they will be pretty well matched. The Arrowwood club has been going strong this year, and they will enter the tournament with the hope of carrying off the big money.

Both Hesper and Glenora will be strong, and the Basano team will enter their regular aggregation of lousy club swingers.

The first game is scheduled to start at 1:00 p.m. sharp, to be followed immediately by the second game.

The final game will commence at 6:15 p.m.

At night the fans and players will wind up the day's sport with a dance in the Masonic Community Hall, with the Basano Harmony Orchestra playing the music.

Wheat Pool Notes

The cut-off date for deliveries of wheat from the 1927 crop to the Alberta Wheat Pool has been changed from July 15th to July 31st. The change in date was made because of the difficulty farmers have had in getting their grain to the elevators over muddy roads.

After July 31st wheat deliveries will go to the 1928 pool.

The board of directors of the Alberta Wheat Pool have decided to allow 2 per cent interest on the volume of wheat received by the organization.

This interest will be paid from August 31, 1927, and the payment will be made as soon as possible.

Lord Rodney, who farms a thousand acres of land in the Edmonton district, has signed a wheat pool contract. The Duke of Sutherland, 7,000 acre farm at Brooks has also been placed under a second series contract.

Countess News

COUNTRESS, July 18—Mr. and Mrs. Smith have been the guests of Mr. and Mrs. Jones, of Hinton, at their home.

Mr. and Mrs. Smith will have charge of the elevator.

Mr. McCutcheon drove a large band of sheep to Basano last week where they will be loaded and shipped to Montreal.

Mr. and Mrs. McDonald and son Donald, returned to their home in Glenora after spending a pleasant holiday with Mrs. A. McDonald.

Mrs. Welsh spent a few days with relatives in Calgary last week, also taking in the stampede.

Congratulations to Mr. and Mrs. J. E. Kell, who are the proud parents of a new 10 lb. baby boy, born at Basano Hospital.

Girls' 100 yards dash, 1st Dorothy Marquess, 2nd Grace Horne.

The boxing card was held in the evening after the conclusion of the stampede events.

The dance in the school house was the last item on the day's program of sport and entertainment.

The school house was packed with a great throng of dancers and the merry making continued until three o'clock in the morning.

WEDDING

MARQUESS—CONNALLY

Miss Joyce Connally, of Basano, was united in marriage to Mr. Clinton Robert Marquess, of Gem, on Wednesday, July 18th at 12 o'clock noon.

The ceremony was performed by the Rev. A. C. Thomson in the Presbyterian Manse.

The happy young couple will reside at Gem.

DANCE IN MASONIC HALL, FRIDAY EVENING

A dance will be held in the Masonic Community Hall Friday evening of this week, July 20th.

The popular Basano Harmony Orchestra will play the music, and everyone is invited to the dance.

SPLENDID CELEBRATION STAGED AT GEM COLONY

Large Crowd Attends Fine Program of Horse Races and Stampede Events—Rain Holds Off While Sports Proceed

The people of Gem Colony celebrated in true western style when they put on a stampede program on Wednesday, July 18th. The sports were fine, the attendance was good, and everything went off smoothly and without a hitch.

Even the weather was favored for the Gem folks, for it rained east, south, and west of Gem, but hardly a drop fell at the stampede grounds, so there was no delay or interruption in the sports.

The management declared the day a most successful one, and the best they have had in years.

Everything to make a real stampede was on the program, including children's sports, horse racing, bucking, bull and steer penning, and Indian races, carnival, dance, and also a boxing card.

Pete LaGrandeur won the saddle horse race, with Byrnes Robinson, of Jasper, coming second.

In the bareback riding, Sherry Morrow took first money, with the Duke of Sutherland second.

His Peak was first in steer riding and Pat Smith second.

Pete LaGrandeur won another first in the steer race, with the Duke of Sutherland second.

In the calf roping contest, Jim Jerry was second.

The car, a Chevrolet sedan, has not yet been recovered, and it is believed to be lying in a deep hole.

WELL KNOWN HUSBAND FARMER IS MARRIED

J. F. McEwan, a well known farmer from 24 miles north-west of Hesper, was married on Friday, June 29th, to Mary Haddock, the wedding taking place at Knox Church in Calgary.

His new bride is the daughter of the late Mr. Haddock.

The happy couple left by auto for Vancouver and the Victoria hotels and other coast cities.

They returned home on Thursday, July 12th.

Friends and neighbors of Mr. and Mrs. McEwan staged a surprise party at their home on Wednesday evening of this week, and extended the wishes for happiness, good luck, and prosperity.

A most enjoyable evening was spent by everyone.

NO GOLF

Nobody plays golf on the Basano course these days. The links are in good condition, but the mosquitoes are so bad that no golfer who would be so rash as to attempt to play will be simply eaten alive.

The little pests are everywhere, and there are millions of them. A man who has been bitten is now violently thirsty for glysters' blood.

JIGGS AND MAGGIE NOW ON THE SCREEN

McMann's Carlinette in "Bringing Up Father" a Riotous Comedy

America's funniest famous family, the Jiggs, of comic-strip renown, will bring their riotous squabbles and reconciliations to the Gem Theatre Friday and Saturday this week, July 20th and 21st, when Metro-Goldwyn-Mayer presents them on the screen in a Comstock production, entitled "Bringing Up Father."

It is a rollicking comedy and brings to film audiences the popular female comedy team of Fatty and Mabel.

And Marie Dressler, who are warranted to be even funnier in this picture than they were in "The Callahan and the Murphys."

The picture is a literal adaptation of George McMann's famous cartoons. Fatty Moran plays Maggie, the redoubtable wife of Jiggs, and Marie Dressler takes the role of Mrs. Daisy Moore.

Known Jiggs, in Jiggs, comes from the town of Hesper, and takes them up to the time they attempt to high hat their corned beef and cabbage origin in their ennoblement of nobility at a Long Island shore place.

And, when the Jiggses, storage passengers from old Dublin, arrive in America in company with the Daisy Moore, and take them up to the time they attempt to high hat their corned beef and cabbage origin in their ennoblement of nobility at a Long Island shore place.

And, when the Jiggses, storage passengers from old Dublin, arrive in America in company with the Daisy Moore, and take them up to the time they attempt to high hat their corned beef and cabbage origin in their ennoblement of nobility at a Long Island shore place.

And, when the Jiggses, storage passengers from old Dublin, arrive in America in company with the Daisy Moore, and take them up to the time they attempt to high hat their corned beef and cabbage origin in their ennoblement of nobility at a Long Island shore place.

ALBERTA FUR PRODUCTION
 INCREASING IN VALUE
 The value of Alberta's fur production for the season of 1926-27 reached a total of \$2,256,962, according to the report just issued by the Dominion Bureau of Statistics. The corresponding figure for the two preceding seasons are as follows: 1925-26, \$2,122,776, and 1924-25, \$2,230,974. Of the total production for the Dominion of \$19,232,977 in 1926-27, Alberta contributed 11 per cent, being exceeded only by Quebec and the Northwest Territories with 16 per cent each and Ontario with 21 per cent.

Having been told that it was electricity that made his mother's hair snap when she combed it, Johnny begged to a visitor: "We're a wonderful family, mother has electricity on her hair and grandma has gas on her stomach."

Here's to matrimony—the high sea for which no compass has yet been invented. —Helen
 President-elect Obregon, of Mexico made a sudden and tragic exit. Political life in Mexico is short, and not so sweet either. —Helen

The weather has been generous with rainfall during the past few weeks, but now we would prefer warm days and dry weather.

THE WATER'S FINE:

Although not yet completed, the swimming pool is now in use, and for the boys and girls is the most popular spot in town.

Every boy and girl should learn to swim, and now there is opportunity to do so with a minimum of danger. Swimming is a beautiful exercise and a great sport, and the number of children who daily use the new pool is evidence of its popularity.

The swimming pool committee of the Board of Trade is to be congratulated on the success of their endeavors. They undertook a most difficult task, but through their tireless efforts and the hearty and generous co-operation of the citizens of town and district they have achieved success.

Off with our hats to the swimming pool committee, and to all with our bathing suits for a dip in the pool. Come on in, kids—no more, the water's fine!

GEN. PEOPLE CELEBRATE

Practically everyone in Gen Colony took a holiday on Wednesday to attend the stampee there. And every body celebrated with genuine vim and enthusiasm, for a spirit of high optimism prevails among the Colony folk in the expectation of harvesting a good crop this fall.

There has been rain in abundance and the crops on all farms are splendid and shaping up for a bumper harvest. No wonder the farmers are jubilant and optimistic.

The weather man, too, favored the Gen people, for on stampee day rain fell all around Gen, but there was hardly a drop at the stampee grounds, and the program was run off without hindrance of this kind.

The Colony had a prosperous year in 1927, and another one is looming up. Altogether, things were never better at Gen Colony. Everybody expects a good crop, and everybody is rising happily on the rising tide of prosperity.

MONARCHY AND DEMOCRACY

The Border Cities Star, of Windsor Ontario, explains the difference between a monarchy and a democracy thus:

"When King George goes on a holiday the newspapers print a brief item about his majesty's departure for the grouse shooting. But when Mr. Coolidge takes a holiday the world is told the size of his shirt, the length of his bathing suit, the number of slices of toast he ate for breakfast, what hymns he sang loudest in church, his opinion on backwoods scenery, the number of times he patted little Ignatz Bazooki on the head, and a thousand and one details of equally vital importance."

BETTER THAN GOLD

Better than grandeur, better than gold,
 This rank and titles a thousand fold,
 Is a healthy body and a mind at ease
 And simple pleasures that always please.
 A heart that can feel for another's
 With sympathies large enough to unfold

Identifying the "Finest of Low Priced Sixes"

THE Pontiac emblem, now a familiar sight on every highway, is the distinguishing mark of the world's finest low-priced six.

It identifies the smoothness of Pontiac's Six-cylinder engine, with its new improved G-M-R cylinder-head, the enduring qualities of Pontiac's sturdy chassis, the easy-riding comfort of Pontiac's Lovejoy Shock-Absorbers, the countless refinements of engineering and construction that spell "quality" in a motor-car.

And, just beside the hood of the New Series Pontiac Six is another symbol of a fine automobile—the "Body by Fisher" emblem, with all that it implies of luxury, craftsmanship and stylish beauty. Pontiac is the lowest-priced six which can claim the distinction of "Body by Fisher."

Whenever you see the familiar "Indian Head" emblem, and say "There goes the New Pontiac Six," you are identifying, beyond doubt, the world's finest of low-priced sixes.

Ask your dealer about the G.M.A.C. Deferred Payment Plan which makes buying easy.

A little girl came into the village drug store and said she wanted a bottle of oil, but had forgotten what kind.

"Is it the kind you put in sewing machines?" the clerk asked.

"No. The kind you put in babies," and the clerk wrapped up a bottle of castor oil.

NOTICE

To Members of Wheat Pool

WHEREAS CLIMATIC AND OTHER CONDITIONS OVER which the farmers had no control have prevented a number of Pool Members from delivering their wheat on prices to date set for cut-off, July 16th, 1925, the Board of Directors, by resolution passed this 17th day of July, 1925, have authorized that any street wheat delivered at or any carload lots billed out of country houses on or before July 31st, 1925, to be settled for on basis of the 1925-26 Pool prices.

Members delivering wheat between the dates of July 16th and August 1st will receive the initial payment on the 1925-26 initial payment schedule, but an adjustment will be made by the Pool Head Office which will bring the payment up to the 1925-26 Pool average price.

HEALTH SERVICE of the CANADIAN HEALTH ASSN. THE IMPORTANCE OF REST

Life consists of alternating periods of activity and rest. To live in a healthy condition, it is necessary that these periods be balanced one with the other.

If activity be too prolonged, there is a loss of efficiency. The tired eye sees less well, the tired muscles do not respond as quickly; the tired workman produces a smaller quantity and a lower grade of work; the tired brain is less efficient.

It is a well established fact that a much greater percentage of accidents occur in factories (toward the end of the day). Even under the stimulus of a patriotic fervor, it was found that the number of shells produced per week, during the great war, was increased by reducing the hours of work in the elimination of Sunday work.

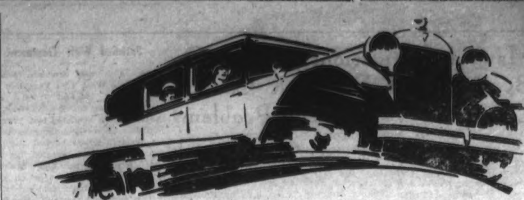

A change is a rest. Recreation or play is a change which provides rest in one manner. It does not, however, provide rest in all ways. It is rest in the sense that it is diversion, but it is not restful in the sense that sleep is. Play furnishes relief from the monotony of work, gives a fresh mental stimulus, but it does not provide for the rest that is needed to re-build and restore the body-cells broken down by activity.

Periods of activity, either at work or at play, must be balanced by periods of rest. And the ideal form of rest is sleep.

When disease attacks the body rest is one of the essentials of treatment. The patient is put to bed and kept as comfortable as possible in order that by means of rest the body may make its best fight against the enemy—disease.

Persons who are below par, adults and children who are under weight, benefit by added rest. Children frequently gain in weight with other change in their routine of life except a rest period after meals.

Rest costs nothing in money, but it means taking time from other things for the purpose. To do without sufficient rest is to wear out the

body prematurely. Rest is required just as much in summer as in winter, which is a truth that people are apt to overlook, both for themselves and for their children.

Questions concerning health, addressed to the Canadian Medical Association, 134 College Street, Toronto, will be answered by letter. Posters displaying these regulations are also being sent to the operators of camps.

ISSUE REGULATIONS FOR TOURIST CAMPS

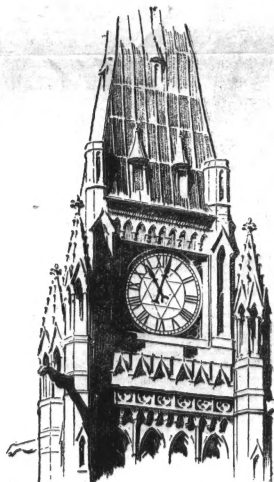

Regulations governing the operation of tourist and recreation camps in Alberta have recently been passed by the lieutenant governor in council and are now being prepared for the secretaries of all health organizations in the province by the Provincial Board of Health. Posters displaying these regulations are also being sent to the operators of camps.

Waited for the Whistle

"Will you please see that your engineer on the 11:30 does not blow the engine's whistle when passing Rose Avenue on Sundays?" said the complainant.

"That's impossible," protested the railroad official. "Why shouldn't he?"

"Because our minister always preaches until the 11:30 passes. Last Sunday it was 35 minutes late."

The Victory Tower of the Dominion Parliament Building at Ottawa, from which the Biring message of the carillon rings forth.

EVERY TWO MINUTES OF EVERY BUSINESS DAY --- SOMEONE IN CANADA BUYS A NEW GENERAL MOTORS CAR

SINCE the days of Confederation, General Motors of Canada Limited has been supplying Canada with transportation. Each year as requirements have multiplied, the scope of General Motors service has widened... the quality of General Motors cars has steadily improved. Each year more Canadians have looked to General Motors for better automobiles, until now, every two minutes of every business day, someone in Canada buys a new General Motors car. These cars are bought by people who

know... by people like yourself... for the very reasons which would guide you in the choice of a car.

They are bought because they are the product of the most progressive organization in the world's most progressive industry... because they reflect the General Motors policy of constant advancement... because they are better cars.

They represent the latest developments of the world's leading automotive research

laboratory, offering these developments to the public as soon as they become available. They are proved in advance, at the expense of General Motors, not the public. They are better cars because they are Canadian cars.

And they embody greater value because of General Motors money-saving methods of quantity buying and volume production. This popularity of General Motors cars holds more than a passing interest for the Canadian car buyer... for General Motors utilizes increased demand to reduce production costs and to offer still more outstanding automobile value.

IT'S BETTER BECAUSE IT'S CANADIAN

Many Investigations Carried On By National Research Council Connected With Crop Problems

Handicaps to research work in agricultural problems, resulting from lack of funds for the purpose, are likely to be overcome through the decision to hand over to the National Research Council \$200,000 of accounts "overages" from the government terminal elevators.

It is to be specially earmarked for plant pathology, grain diseases, and the like. "Surpluses" accruing from the elevator trade will thus go indirectly to assist the problems of grain growing.

The research council and the department of agriculture, in co-operation with the universities, have been engaged in combating mainly grain rust and root rots. Recently an associated committee on field crop diseases has been appointed by the council jointly with the Federal Department of Agriculture for the purpose of undertaking research work into field crop diseases.

The importance of such a research will be appreciated when it is stated that the estimated cost annually to the North American countries through such diseases ranks from 15 per cent. to 20 per cent. of the total crop values.

At the present time, agricultural research work is going on in the University of Alberta summer building laboratory where representatives of the Research Council, the Federal Department of Agriculture and the University are working together. The same arrangement for improvement of the University of Saskatchewan, in the University of Manitoba the laboratories were provided by the Federal Department of Agriculture, and are being run in co-operation with the University of Manitoba.

At the present time, Professor Robert Newton is undertaking an investigation of the factors governing the milling and baking quality of wheat with the purpose of ascertaining why the quality of wheat varies so widely from place to place, and the possibilities for improvement by the use of better adapted varieties and better cultural practices. Professor Newton is also endeavoring to obtain a better knowledge of the possibilities and limitations of methods for grading wheat on a quality basis.

A further investigation has been conducted by Professor E. H. Strickland into the life story and control of prairie inhabiting wireworms and false wireworms with the purpose of reducing the present annual losses to farmers which now amount to many thousands of dollars annually. Professor F. H. Roberts is conducting an investigation for the purpose of determining the exact factors concerned in the inheritance of sugar and starch in the endosperm in Indian corn, while a further investigation is being conducted by Professor A. H. Butler, with respect to the size of spores in fungi, and Professor A. T. Cameron is working in research into the glucosides of plants indigenous to Western Canada and adjacent territory.

Technical researches with respect to the effect of light upon organisms are being conducted by Professor A. O. Kluge, who hopes to secure data which will have important application in respect to the fisheries, the forests and human life, while other researches are being carried out by E. A. Lloyd in connection with poultry.

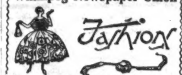

A further research is being conducted by Professor Robert Newton for the purpose of discovering the fundamental nature of frost resistance in crop plants and the different reliable methods by which the plant breeder may estimate accurately the hardiness of a new strain the first season rather than be forced to test it in field plots for several winters.

Researches are also being conducted by Professor A. E. Cameron into

the economic significance of the horse-die to stock breeders; by Professor F. J. Lewis into the reserve food materials in evergreen leaves during winter seasons; by Professor J. H. Pryor, into the biological origin of false wild oats; by Professor W. S. Thompson into the inheritance of earliness and lateness of wheat and the making of early hybrids direct breeding; by E. S. Hopkins the subject of determining the water requirements of crops; by Professor W. Sadler, on the subject of the correlation of the grading of cream and butter with the bacterial content of the milk or cream used in the preparation of these products; by Dr. J. F. Snel, on the subject of acidity and lime requirements of Quebec soils; by Dr. F. C. Harrison, on a variety of subjects regarding soil contents; and by Professor G. W. Search, on the effects on plant growth of the various electro-positive elements or ions and the more fundamental causes of these effects.

By no means the least important of the co-ordinative and co-operative researches which have been going on for some time past and from which results are being secured is that in connection with tuberculosis, a full report of which will be forthcoming next autumn.

Satisfied With Treatment

British University Students Returning To West This Year For Harvest

So satisfying to all concerned was the assistance rendered last year by British University students during the Western wheat harvest that the experiment will be repeated this season. A party is now being organized that will leave for the West about August 3, returning from Montreal exactly two months later, and Canada, a London Weekly devoted to Canadian affairs, has been interviewing members of the 1927 expedition regarding their experiences.

Practically all the students' volunteers expressed themselves as delighted with their reception, and satisfied with the treatment accorded them while resident in the Dominion. This unanimity is particularly pleasing in view of the contrary statements made by the Bishop of London that Southern European students were a cordial welcome than was extended Britishers. One of last year's students, indeed, is quoted as exclaiming: "The warm welcome and unbounded hospitality we received from everyone will not readily be forgotten."

Among the other quoted opinions appearing in the columns of Canada are: "I must not forget the kindness of the 'farmers' partners';" "I cannot possibly describe the kindness we met everywhere we went;" "I found the farmers kind and patient, and everybody only too willing to help;" "I wish to express my deep gratitude to the Canadians for their generous hospitality."

Depth To Flow Follow

Experiments Show Sub-Selling Does Not Help Yield

There seems to be no good reason for deep ploughing in summer fallow land in the Prairie Provinces. Experiments carried out by the Dominion Experimental Farms and Station have shown that there is no advantage to be gained by going deeper than from five to six inches. Practically no increase in yield was secured when the ploughing was done at any depth from three to eight inches. Messrs. E. S. Hopkins, and S. Barnes, who reviewed this work in Bulletin No. 98, of the Department of Agriculture, bring out the fact that subsoiling did not help the yield. Wheat, however, did ploughing is done shallow or deeper.

Wheat pasture compared with rape pasture for hogs in an experiment conducted at the Rothamsted Experimental Station, showed wheat pasture gave better results. With two lots of hogs otherwise fed alike, those on wheat pasture made a higher daily average of .37 pounds at a cost of 8 cents less per pound than the lot on the rape pasture. The rape and wheat pasture made very little difference in the type of the hogs, although, according to the report of the station for 1927, building up at Ottawa, the hogs fed on the wheat pasture showed a better finish.

Dairy Production

Value Of Dairy Products In Canada For This Year Will Reach High Figure

Dairy production in Canada, according to that branch of the Department of Agriculture, will amount to \$250,000,000 this year. Milk production is estimated at 14,000,000,000 pounds consumed as milk and the rest as creamery butter, dairy butter and cheese. The milk cow population is given as 3,684,511, an increase of 55,120 over the year before. The gross aggregate of agricultural wealth is placed at \$7,968,460,000.

Turner Valley Oil

The Turner Valley oil production for May exceeded \$1,000,000, valued at about \$160,000, according to The Calgary Herald. Earlier estimates published did not include production from the Sponner, Yutan and McDougall-Segur wells, which ran to 4,412 barrels.

Largest Annual Exhibition

The Coliseum at the Canadian National Exhibition, Toronto, a civic enterprise, is the world's largest exposition building, covering 10 1/2 acres. This exhibition is the largest in the world held annually. It will be held this year from August 29th to September 8th.

The steamship Albatross which left North Sydney, N.S., on July 18 with a detachment of the Royal Canadian Mounted Police, headed for Greenland, Baffinland, and then to Bache Peninsula, most northerly police post in America. The expedition is commanded by G. P. Mackenzie, whose picture is inset above.

Ruling Likely To Stand

Cancellation Of Duty On Publication Is Not Looked For

It is considered unlikely that the Privy Council of Canada will upset the ruling of the Board of Customs, which imposed a duty of 25 per cent. on periodical publications consisting almost wholly of fiction and not containing a reasonable amount of critical and readable articles, news items or articles relative thereto or current topics.

The Wholesale News Dealers Association of Canada recently appealed almost unanimously the ruling of the Board of Customs to the effect that high speed fiction, novelettes, detective stories, thrillers and magazines exploiting sex questions, the underworld, love mysteries, the eternal triangle and the like, must pay duty upon entering Canada. The majority of these periodicals come from the United States.

The Customs Board has adequate authority under the statute to place these on the dutiable list and the only body which can over-ride the board now is Parliament itself, as the Privy Council already has sustained the ruling of the Board. The Privy Council in this case is the Federal Government.

Hog Pastures

Wheat Pasture Compared With Rape Pasture In Experiment

Wheat pasture compared with rape pasture for hogs in an experiment conducted at the Rothamsted Experimental Station, showed wheat pasture gave better results. With two lots of hogs otherwise fed alike, those on wheat pasture made a higher daily average of .37 pounds at a cost of 8 cents less per pound than the lot on the rape pasture. The rape and wheat pasture made very little difference in the type of the hogs, although, according to the report of the station for 1927, building up at Ottawa, the hogs fed on the wheat pasture showed a better finish.

Pemmican For Eskimos

Wainwright Buffalo Pemmican Shipped To North For Food For Natives

A recent shipment of buffalo from Wainwright brought the season's quota up to 1,008 head, which will probably be the final allotment to the Mackenzie River District.

At the present time pemmican prepared from buffalo meat is shipped through the pack abattoir, by a big Alberta packing house last winter is being shipped to an eastern port for transportation to the natives in the Eastern Arctic. Already consignments have been forwarded by water to the Eskimo in the vicinity of Akkavik, where it was understood to have met with considerable favor.

Coal, a scientist tells us, keeps on improving in quality with increasing age. It seems there's no fuel like an old fuel.

The average man wants to handle the rudder all the time without taking his turn at the oars.

SO LONG CHAPS

Stung to protest by the slur that they were "cowboys" and "cowboys," the guides of the Rocky Mountains are reported to be discarding their picturesque "chaps" in favor of common or garden trousers.

The guides in the neighborhood of the Banff Springs Hotel are the delight of visitors, with their broad brimmed hats and sheepskin sheep chaps, worn primarily in the early days to protect the riders from leg injury when having hard-boned steers on the prairie. The fact that the unadorned riding breeches are as serviceable and give as much cause for criticism as wearing an affect, is apparently bringing about a change in fashion, and soon the brown leather "chaps" and movies depicted it may be only a memory piece.

The Rocky Mountain guides in handling parties of tourists, many experimenting with trail making for the first time, have an amusing and easy making and breaking camp and catering to the needs of their parties, but in making the most timid tenderfoot and bringing all through happy and unharmed.

Prominent Canadian Educationist Speaks On High Standards Of Life That Obtain In Dominion

In Charge Of Transportation

Representing 30,000 Canadian teachers, Dr. H. Hardy, of Toronto, president of the Canadian Teachers' Federation, brought greetings from Canada to the National Education Association, of the United States, in annual convention at Minneapolis, under Miss Cornelia Adair, president of the association.

Dr. Hardy stressed the achievements of Canada and the important part played by the teaching profession, which in the Dominion maintained a uniformly high standard under the rigid supervision of the provincial education departments.

"Speaking as a Canadian, it seemed to me fitting that I should try to express to you, though in the briefest way, the high standards of life, material and spiritual, in the Dominion of Canada and Canadian life and the relations of the Canadian teachers to that national life," Dr. Hardy said.

"There are certain characteristics of Canada which I would note. First, the high standards of life, material and spiritual. Thanks to our natural resources, agricultural and mineral, rich beyond the dreams of the wildest imagination, and to the marvellous development of these resources, our people live in a general comfort and prosperity, unimagined anywhere except in the United States. On the spiritual side we have a creditable achievement in literature, painting, architecture, music, and the power of religion in our life is deep and vital. In her general standard of life, both material and spiritual, Canada is second to no other country in the world."

"Second, Canada is a land of democracy. In Canada, we have must every administration, federal and provincial, go to the people for election every four or five years, but they may go at any time, if public opinion demands it. We have, provincially, through our federal, provincial and municipal governments, thousands of men and women to represent their fellow citizens. Possibly no other country elects a larger percentage of its citizens to public office. As to public ownership, Canada occupies a front rank."

"A third characteristic is co-operation. Our resources are so enormous, our population so small yet, and so scattered that we have been learning that in cooperation lies our hope of success. Two striking examples may be given. The English and the French races are united in the government and the development of Canada with marked success. The Religious Education Council of Canada is a nation-wide organization of the great religious denominations, and the Y.W.C.A. for a systematic undertaking of the great work of the religious cultures of our young people. So far as I know this is the only nation-wide movement of the kind in the world."

Dr. Hardy established the Dominion's position in the British Empire of which it was proud to be a member, and continued: "Internationally we are taking our place. One of our greatest Canadians was a member of the small group who made the League of Nations, and the Y.W.C.A. has been a member of the League of Nations from the first. A Canadian has been President of the Assembly of the League, and Canada is now admitted to the inner circle group, the council of the League. In Imperial and International affairs Canada is assuming her place and her people are developing an imperial and a world outlook."

"Relays Come and Movement"

J. L. Baird has demonstrated two of the latest developments in his television group, a few, transmission of movement in ordinary daylight and colored views. By these developments the broadcasting of action views of open air events is possible, as well as the transmission of scenes containing color.

"If matches are made in heaven the shipping clerk must make some awful blunders."

Jim Jordan, of Majorville, was in Bassano on Monday.

Mr. and Mrs. J. R. Donaldson went to Calgary last Friday to spend the week-end in the city.

R. C. services will be held in Bassano next Sunday morning at 9:00 o'clock.

Miss Jean Johnston, of Calgary, is visiting at the home of Mrs. Jan Johnston.

Miss Myra Warren, of Calgary, is a guest at the home of Mrs. J. W. Bulmer.

William Piansan and Art Piansan spent the week-end north of the Red Deer river, near Hutton.

Mrs. W. R. Agate and Miss Agate left on Monday for a few days' holiday in Banff.

Rev. H. M. Little, rector of the Church of the Advent, Westmount, Montreal, was a guest of Mrs. M. Lee for a few days last week.

The Rev. Mr. Plummer, of Calgary, took the morning service at the Anglican Church last Sunday in the absence of Canon Harrison.

Mr. and Mrs. T. Lawrie and children left Monday for Calgary and other points. They are taking two weeks' vacation.

Miss E. McArthur left Sunday on her vacation, going home to Kneehill Valley for a few days, and then will make a motor trip to the Pacific coast.

Rev. Hargrave left last week to attend his duties as secretary of the Anglican summer school at Banff, being held from the 16th to the 26th of July.

Governor General Willingdon's special train passed through Bassano Saturday afternoon at 2:15, bound for Calgary. The party was returning to Calgary after visiting in Lethbridge and Medicine Hat. The train did not stop at the station.

Among the Bassano people who attended the Calgary exhibition and stampede last week were Mr. and Mrs. M. D. McDonald, Mr. and Mrs. M. E. Grantlund, Mr. and Mrs. E. P. Currie, Mr. and Mrs. W. S. Playfair and children.

JOINING THE WHEAT POOL IS GOOD BUSINESS

A Toronto Business Man, Owner of Alberta Farm Land, Says He Would Not Think of Staying out of the Alberta Wheat Pool.

J. T. Todd, general manager of the J. T. Todd Lumber Company, Toronto, Ontario, is the owner of a large tract of land in the Crowfoot district in Alberta. He is a staunch member of the Alberta Wheat Pool. In fact, so interested is Mr. Todd in the Pool's development that he is endeavoring to persuade non-pool neighbors to join the organization.

In a recent letter to a neighbor in Crowfoot, Mr. Todd says:

"Dear

"I have often wondered if you had joined the Wheat Pool. If you have not, I believe if you will consider this matter seriously you will find it is much to your interest to be a member of the Pool. As you know, the Pool is only the farmer in business for himself, and the more support the Pool has the better it is going to do for all of us. It is simply a cold-blooded proposition so far as we are concerned and we, like everyone else in business, want to get as much for our labor and wheat as we can. This is a day of co-operation and not only the farmers are doing this but the largest industries, such as automobile and steel, are doing the same. The people in the steel and automobile business are considered to be the brainiest in the world and they are following the lead which the farmers have pointed out to them during the past five years. Stories are also doing the same.

"I believe if you will consider this matter from your own best interest and the best interests of the community and farmers at large you will decide that YOU CANNOT AFFORD NOT TO BE A POOL MEMBER. I would not think of being out of the Pool myself, and I just purchased 320 more acres of land this spring, and so you know, 200 acres of that is now broken and will be in crop next year. All of my land is in the Pool, and in fact, if I had ten times as much land as I have it could be handled in no other way than through the Pool.

"I would like to see you and all the other fellows in Crowfoot district members of the Pool. If enough would come in we could have an elevator at Crowfoot and that is what we want in this. I believe that with the way the movement is growing we will eventually have it."

Performance Style Luxury Quality

at Low Cost

If you could have exactly the kind of car you wanted, what are the features you would demand?

You would want Performance... stamina to stand long, trying trips.

Then you would want Style, of course—the latest trend in body design—long, low, racy lines—the newest and most modish colorings. You would want the distinction of Body by Fisher.

And you would like a Luxurious car... one with wide, deep cushions that invited rest... with rich and beautiful upholstery and fine interior appointments... one with snug protection against the weather with ease and smoothness of riding.

Last, but by no means least, you would demand Quality... substantial construction... refinements such as Four-Wheel Brakes, Air-Cleaner, Oil Filter, Crankcase Breather, Vacuum-Feed Fuel Supply, Safety Gasoline Tank in rear and so forth... dependability at all times and under all conditions! These are the things everyone would like to have in a car... and that everyone CAN have, for the first time in automobile history, at the low cost of the "Bigger and Better" Chevrolet.

The C.M.C. - General Motors are offering better than before the most convenient and economical way of buying your Chevrolet on time.

PLYMOUTH FEATURES — An absolutely new development in motor car style. . . New slender profile. . . Long, low bodies. . . New type beaded crown fenders. . . Molded edge running boards. . . Gripping room for 2 to 4 passengers, according to body model. . . Luxurious deep upholstery and appointment details such as you expect only in a car of far higher price. . . Beautiful bowl type head lamps. New "Silver Dome" high compression engine, for use with any gasoline. . . Smooth speed up to 60 miles and more per hour. . . Characteristic Chrysler acceleration. . . Unbelievable smoothness of operation at all driving speeds. . . New type velvet power rubber engine mountings. . . Body impulse neutralizer. . . New type shock absorbing spring compensators give exceptional riding comfort. . . New type spring shackles—reduce noise, wear, attention. . . Chrysler light-action internal expanding hydraulic four-wheel brakes—no other car of this price possesses this feature.

A STATEMENT BY—

Walter P. Chrysler

All Chrysler research, engineering, and manufacturing have been inspired by the fundamental motive of giving ever greater quality and value for each dollar of car cost. Public recognition of this principle, in four years advanced Chrysler from 27th to 2nd place in sales in the N. A. C. C.

Now, with a new product—the Plymouth—Chrysler is the first to give at so low a price the advantage of performance, riding ease, dependability and full adult size which characterize fine cars of high price.

The Plymouth daily answers the search for quality in the low price, sold of more than fifteen million automobile owners. The Plymouth assures in the following exceptional advantages the full measure of quality and value to which buyers of low priced cars have long been entitled—

Smooth speed up to 60 and more miles an hour and Chrysler acceleration given by the new "Silver Dome"

\$670 and upwards

COUPE \$670
ROADSTER \$670
2-DOOR SEDAN \$690
TOURING \$695
DE LUXE COUPE \$720
4-DOOR SEDAN \$725

All prices Cash, Detroit, Michigan. Chrysler dealers are in a position to extend the convenience of time payments.

high compression engine, with which you can use any gasoline; compact and roominess of car; costlier cars; luxurious interior finish; smartness and style equal to the most beautiful; rugged strength to assure the long life and economy of operation so vital to the buyer who would conserve his outlay; the safety secured only by internal expanding hydraulic 4-wheel brakes; and such high priced features as body impulse neutralizer, air filter, shock absorbing spring compensators, all-rubber engine mounting, and full balloon tires.

The new Chrysler-designed and Chrysler-built Plymouth is so revolutionary an advance over other low priced cars, it is such conclusive evidence that the past year's stride in the science of manufacturing have multiplied the purchasing power of the motor car dollar, that you will surely want to see it and drive it.

A Plymouth ride is the best demonstration of the ease with which it keeps from 5 to 60 and more miles per hour—the quiet of its power and the smoothness of its flight. You yourself must put your foot to the light-action internal hydraulic 4-wheel brakes to know the confidence of the fastest and safest deceleration you have ever experienced.

And above all, you must see its beautiful lines and finish, and stretch at ease in its deep-upholstered, full adult-size bodies, to comprehend how completely the Plymouth surpasses cars heretofore sold under \$1,000.

We have named it the Plymouth because this new product of Chrysler engineering and craftsmanship so accurately typifies the endurance and strength, the rugged honesty, the enterprise, the determination of achievement and the freedom from old limitations of that Pilgrim band who were the first American colonists.

The Plymouth today is displayed by more than 6,000 Chrysler dealers who want you to see it and to ride in it.

Please submit the Plymouth to this trial. We believe you will discover there has never been a car anywhere near its price that can approach the Plymouth for power, pick-up, smoothness, easy handling, safety, quietness and roominess—nor that can equal it in beauty and style.

GROCERIA and MEN'S WEAR

WHO LOWERED THE COST OF LIVING FOR THIS DISTRICT

Local News

A son was born to Mr. and Mrs. J. Kier, of Cassiar, on Friday, July 13th, at the Bassano Hospital.

A. Shering, of Hussar, is a patient in the local hospital, and is improving after an operation.

Mr. Dyck, of Hussar, was recently operated on in the Bassano Hospital. He is now improving.

Geo. Germain was brought to the hospital from Rosemary on Tuesday, with a broken jaw.

Mrs. E. Shinton and children, of Calgary, are the guests of Mrs. W. J. Redmond.

Miss Myrtle Balle left last Saturday for her home in Cereal where she will spend her vacation.

Miss Gladys Hayes left on Thursday to spend her vacation at Seattle. She will make the trip by motor with her brother, Edward, and Miss R. McArthur will accompany them.

Notably Situated

"Howdy, Lads," saluted an acquaintance. "How's everything?" "Fine, 'fug hair," returned Lyle. "Larg of Hoogie Hollar. 'O' course it was so wet last spring that I didn't raise nuthin' 'worth braggin' about" and while got a "rain" in her head and ain't no 'count for nuthin', a couple of the children got snake bit yint'd'y and are yellin' about it yet, my brother-in-law took a notion to die on me not long ago and mused the place up scan'lous, the south end of the house got burned off one night last week, our cow cow choked to death tuther day, and such like."

"But a couple of my hands have got six pups apiece. Partiest I'll seal-lags you ever laid your eyes on!"

ALBERTA HIGHWAYS TO BE SURFACED WITH OIL

With a view to improving the condition of Alberta's main highways and reducing the cost of maintenance, a series of experiments will be conducted on a number of gravelled roads in the province during the next few weeks to test the efficacy of a covering of oil. It is announced by Hon. O. I. McPherson, minister of public works, that a heavy asphaltic oil will be used in surfacing the roadbed for several miles on the principal highways. Satisfactory results are anticipated from this treatment which has proved highly satisfactory in a number of the eastern provinces.

COURT NEWS

Reze LeBlanc, of Rosemary, was fined \$10 and costs in the Bassano Police Court for Driving a car on the streets of Bassano at night with no lights.

Another case under the Motor Vehicles Act was a fine of \$150 and costs for driving a car with only one number plate.

Three men were fined \$20 and costs for drunkenness. Two of them took the alternative of 30 days at Leithbridge.

TO CONTRACTORS

Sealed tenders will be received by the Board of the Bassano Municipal Hospital District No. 6, at the office of Henry W. Ford, Esq., C. A., secretary treasurer, up to noon, July 25th, 1928, for the erection and completion of an addition to the existing Hospital Building, a Nurses' Home, and an Isolation Block, at the Bassano Hospital, according to plans and specifications prepared by D. S. McIlroy, architect, Calgary. Plans and specifications may be obtained from the secretary treasurer or from the architect, on payment of a deposit of \$5.00, which deposit will be refunded on the said plans and specifications being returned in good condition within three days.

A marked cheque for five per cent. of the amount of tender is to be enclosed with each tender as a guarantee that the same is bona fide. The lowest or any tender will not necessarily be accepted.

HENRY W. FORD,
Secretary treasurer.
